

OUTREACH PLAN

The implementation of the Symmes Neighborhood Protection Plan requires open and fluid communication throughout the duration of the project between the Symmes Redevelopment Associates Team, the Neighborhood Committee, the surrounding abutters, and the Town. Constant input and feedback from those impacted by the Symmes redevelopment will ensure a Protection Plan that proactively addresses issues and puts in place a plan to resolve unforeseen issues as they arise throughout the project.

To that end, SRA plans to implement the following actions:

1. Community Meetings

- SRA will establish a regular time to meet with the Neighborhood Committee on-site to review project progress, discuss relevant issues or problems and make certain the project is adhering to the parameters set forth in this Neighborhood Protection.
 - i. Meeting minutes will be submitted to the Town for public record.

2. Emergency Contact

- SRA will provide 24-hour access to personnel that are directly responsible for day-to-day construction activities.
